Prevention Bulletin

2025

XX

2025 Campaign

The Yadkin County Fire Marshals Office is teaming up with NFPA to promote this year's Fire Prevention Week, October 5-11, Charge Into Fire Safety: Lithium-Ion Batteries in Your Home.

Help us spread this word about making smart choices when it comes to buying, charging, and recycling lithium-ion batteries--because the wrong move can lead to a fire. For more info: fpw.org

Anything with lithium-ion battery--phones, laptops, e-bikes, power tools--can become a fire hazard if it's not charged safely. Always use the charger that came with the device or one approved by the manufacturer. If the cord only works when you bend it just right, it's time to replace it. Before you buy anything with a lithium-ion battery, do your homework. Check the packaging and product for a mark from a nationally recognized testing lab--that stamp means it meets real safety standards. A lot of products sold online and in stores don't, and that can seriously increase your risk of fire.

Charge any lithium-ion battery device on a hard surface--never on your bed, couch, or under a pillow. And don't overcharge. Once it's at 100%, unplug and move on.

Smoke Alarms at Home

SMOKE ALARMS ARE A KEY PART of a home fire escape plan. When there is a fire, smoke spreads fast. Working smoke alarms give you early warning so you can get outside quickly.

SAFETY TIPS

- Install smoke alarms in every bedroom. They should also be outside each sleeping area and on every level of the home. Install alarms in the basement.
- Large homes may need extra smoke alarms.
- It is best to use interconnected smoke alarms. When one smoke alarm sounds, they all sound.
- Test all smoke alarms at least once a month. Press the test button to be sure the alarm is working.
- Current alarms on the market employ different types of technology including multi-sensing, which could include smoke and carbon monoxide combined.
- Today's smoke alarms will be more technologically advanced to respond to a multitude of fire conditions, yet mitigate false alarms.
- A smoke alarm should be on the ceiling or high on a wall. Keep smoke alarms away from the kitchen to reduce false alarms. They should be at least 10 feet (3 meters) from the stove.
- People who are hard-of-hearing or deaf can use special alarms. These alarms have strobe lights and bed shakers.
- Replace all smoke alarms when they are 10 years old.

FACTS

- ❗ A closed door may slow the spread of smoke, heat, and fire.
- ❗ Smoke alarms should be installed inside every sleeping room, outside each separate sleeping area, and on every level. Smoke alarms should be connected so when one sounds, they all sound. Most homes do not have this level of protection.
- ❗ Roughly 3 out of 5 fire deaths happen in homes with no smoke alarms or no working smoke alarms.

Smoke Alarms

Working smoke alarms save lives. However, people who are deaf or hard of hearing may not be able to depend on the traditional smoke alarm to alert them to a fire.

for People who are Deaf or Hard of Hearing

Install smoke alarms in every bedroom. They should also be outside each sleeping area and on every level of the home. For added safety, interconnect all the smoke alarms. If one sounds, they all sound. This gives people more time to escape.

SAFETY TIPS

- Smoke alarms and alert devices are available for people who are deaf or hard of hearing.
- Strobe lights flash when the smoke alarm sounds. The lights warn people of a possible fire.
- When people who are deaf are asleep, a pillow or bed shaker can wake them so they can escape. The shaker is activated by the sound of a smoke alarm.
- When people who are hard of hearing are asleep, an alert device that uses a loud, mixed, low-pitched sound can wake them. They may find a pillow or bed shaker helpful. These devices are triggered by the sound of the smoke alarm.
- Research the products and select the ones that best meet your needs.

WHERE TO FIND EQUIPMENT

Search home improvement store websites or use a general search engine to look for strobe light smoke alarms. BRK/First Alert, Gentex, and Kidde brands offer this type of smoke alarm. Find smoke alarm accessories such as pillow or bed shakers, transmitters, and receivers at lifetonesafety.com, safeawake.com and silentcall.com. Choose devices that have the label of a recognized testing laboratory.

FACT

Home fire sprinklers keep fires small. This gives people more time to escape in a fire.

AND DON'T FORGET...
Test all smoke alarms at least once a month using the test button.

How to make a Home Fire Escape Plan

FIRE PREVENTION WEEK™

NFPA® — The Official Sponsor of Fire Prevention Week Since 1922

Visit Sparky.org for more activities!

- ☐ Draw a map of your home. Show all doors and windows.
- ☐ Visit each room. Find two ways out.
- ☐ All windows and doors should open easily. You should be able to use them to get outside.
- ☐ Make sure your home has smoke alarms. Push the test button to make sure each alarm is working.
- ☐ Pick a meeting place outside. It should be in front of your home. Everyone will meet at the meeting place.
- ☐ Make sure your house or building number can be seen from the street.
- ☐ Talk about your plan with everyone in your home.
- ☐ Learn the emergency phone number for your fire department.
- ☐ Practice your home fire drill!
- ☐ Make your own home fire escape plan using the grid provided on page 2.

How to make a Home Fire Escape Plan

NFPA® — The Official Sponsor of Fire Prevention Week Since 1922

Visit **Sparky.org**
for more activities!

- Draw a floor plan or a map of your home. Show all **doors** and **windows**.
- Mark **two ways out** of each room.
- Mark all of the **smoke alarms** with (SA). Smoke alarms should be in each sleeping room, outside each sleeping area, and on every level of the home.
- Pick a family **meeting place** outside where everyone can meet.
- Remember, **practice** your plan at least **twice a year!**

This image shows a full page of blank graph paper. The grid consists of small, equal-sized squares formed by thin, dark gray lines. There are 20 columns and 20 rows of these squares, creating a total of 400 square units. The background is white, and the grid covers the entire area of the page without any margins or additional markings.

BE HALLOWEEN Safe

Halloween is a fun, and spooky, time of year for kids. Make trick-or-treating safe for your little monsters with a few easy safety tips.

Sparky® is a trademark of the NFPA.

HALLOWEEN FIRE SAFETY TIPS

- »» **When choosing a costume**, stay away from long trailing fabric. If your child is wearing a mask, make sure the eye holes are large enough so he or she can see out.
- »» **Provide children** with flashlights to carry for lighting or glow sticks as part of their costume.
- »» Dried flowers, cornstalks and crepe paper catch fire easily. **Keep all decorations** away from open flames and other heat sources like light bulbs and heaters.
- »» **Use a battery-operated** candle or glow-stick in jack-o-lanterns. If you use a real candle, use extreme caution. Make sure children are watched at all times when candles are lit. When lighting candles inside jack-o-lanterns, use long, fireplace-style matches or a utility lighter. Be sure to place lit pumpkins well away from anything that can burn and far enough out of the way of trick-or-treaters, doorsteps, walkways and yards.
- »» **Remember** to keep exits clear of decorations, so nothing blocks escape routes.
- »» **Make sure** all smoke alarms in the home are working.
- »» **Tell children** to stay away from open flames including jack-o-lanterns with candles in them. Be sure they know how to stop, drop and roll if their clothing catches fire. (Have them practice, stopping immediately, dropping to the ground, covering their face with hands, and rolling over and over to put the flames out.)

If your children are going to **Halloween parties** at others' homes, have them look for ways out of the home and plan how they would get out in an emergency.

Did you know?

Decorations are the first thing to ignite in roughly **800** reported home fires each year. More than one-third of these fires were started by a candle.

With harvest season getting underway across North Carolina and Yadkin County, more heavy farm equipment is going to be out on the same roads as vehicle traffic, going from field to field, dramatically increasing the odds for accidents.

"No farmer driving down the road wants to create a traffic jam, so we all need to be patient and cautious of one another," Fire Marshal Leonard said. "Whether it's the farmer driving the tractor or the combine, or the person in a vehicle, we all need to recognize that everyone has to go down these same roads as safely as possible so we can all come home to our loved ones."

Safe Driving During Harvest

- Watch for farm machinery - it can unexpectedly turn onto public roads from a field or driveway.
- Farm machinery usually travels at 25 mph or less - be prepared to slow down.
- Keep a safe distance.
- Allow time and distance for farm equipment to make wide turns.
- The machine operator may have obstructed views - make sure to stay far enough away for them to see you.

YADKIN COUNTY

EMERGENCY SERVICES

The Yadkin County Fire Marshal's Office is proud to serve the citizens of Yadkin County by promoting the importance of fire safety through education, inspections, and investigations. The Fire Marshal's Office functions under the direction of the emergency services director.

The Fire Marshal's Office is responsible for various duties, which include:

- County Fire Inspection Program
- Fire / arson investigations
- Budget preparation
- Coordination between county government and county fire departments
- Fire prevention programs
- Response to emergency situations

Ricky Leonard, Fire Marshal
